

# COVID-19 GUIDANCE

## COVID-19 Settings and clinical procedures considered or suspected to be aerosol generating set

### PROCEDURE

Recently performed a healthcare related procedure  
 Recently performed a bronchoscopy  
 Recently performed a change of tracheostomy tube  
 Recently performed a dental air polishing procedure  
 Recently performed a dental air-water syringing procedure  
 Recently performed a dental scale and polish procedure  
 Recently performed a dental sonic scaling procedure  
 Recently performed a dental ultrasonic scaling procedure  
 Recently performed a direct current defibrillation procedure  
 Recently performed a dysphagia assessment  
 Recently performed a gastroscopy with open suctioning of respiratory tract  
 Recently performed a lung recruitment manoeuvre  
 Recently performed a nasopharyngeal swab procedure  
 Recently performed a percutaneous dilational tracheostomy  
 Recently performed a percutaneous tracheostomy  
 Recently performed a post-mortem procedure  
 Recently performed a removal of tracheostomy tube  
 Recently performed a respiratory physiotherapy procedure  
 Recently performed a throat examination using tongue depressor  
 Recently performed a tooth preparation procedure using air abrasion  
 Recently performed a tooth preparation procedure using air turbine handpiece  
 Recently performed administration of BiPAP (bi-level positive airway pressure) ventilation  
 Recently performed administration of CPAP (continuous positive airway pressure) ventilation  
 Recently performed administration of HFNC (high-flow nasal cannula) oxygen therapy  
 Recently performed administration of HFOV (high frequency oscillatory ventilation)  
 Recently performed administration of medication via nebuliser  
 Recently performed administration of nitrous oxide and oxygen gas analgesia  
 Recently performed administration of NIV (non-invasive ventilation)  
 Recently performed administration of oxygen by Venturi mask  
 Recently performed administration of pressurised humidified oxygen therapy  
 Recently performed an airway suctioning procedure  
 Recently performed an emergency tracheostomy  
 Recently performed an endotracheal intubation  
 Recently performed an extubation of trachea  
 Recently performed an incision of trachea  
 Recently performed an induction of sputum procedure  
 Recently performed an insertion of tracheostomy tube  
 Recently performed chest compressions  
 Recently performed insertion of Guedel airway  
 Recently performed insertion of nasogastric tube  
 Recently performed mobilisation with intent to cause cough  
 Recently performed oxygen administration by bag valve mask  
 Recently performed oxygen administration by mask  
 Recently performed oxygen administration by non-rebreather mask  
 Recently performed removal of nasal foreign body

# COVID-19 GUIDANCE

COVID-19 Settings and clinical procedures considered or suspected to be aerosol generating set

## SETTING

- Recently worked in a healthcare setting
- Recently worked in a community social care setting
- Recently worked in a hospital emergency care setting
- Recently worked in a primary care setting
- Recently worked in a residential care setting
- Recently worked in an ambulance service care setting
- Recently worked in an inpatient care setting
- Recently worked in an intensive care setting
